VISION /R4 CORPORATION

Company Background

Vision /R4 Corporation was incorporated under “Canada Business Corporation Act” on November 21st 1996. It was founded by Mr. Jean-Paul Ouellette, holding 97% of the issued Class “A” common stock. Since its inception, Vision has developed the APOGEE SOLUTION, a fully integrated modular system of the ERP modules (Enterprises Resources Planning) and ABM (Activity Based Management) to which others can be added as required, the whole catering to clients from financial institutions, manufacturing and distribution organizations, service organizations to various government agencies. Vision /R4 Corporation’s products do not only interest information technology specialists in the high ranking financial and government activities, but also IT specialists from other companies and organizations requiring a sophisticated and flexible solution to meet all of their specific needs. Vision /R4 Corporation Solution operate on open platform and can be easily modified to meet each client’s requirement.

With offices in Canada, Vision /R4 Corporation has also acquired a network of distributors and resellers in USA, Europe and Africa. Vision /R4 Corporation has an established clientele worldwide. 3 prospects currently under review

- We are convinced that we can implement a system within the timeframe and budget that is mutually agreed upon.
- Vision /R4 has always supported its product and its clientele. We are an organization targeted to a business solution first, and a technology provider second.

Vision /R4 Corporation is a leading software developer and distributes a complete and integrated set of applications software answering the need of private, public and governmental organizations. Our library of application modules include complete accounting ledgers and sub-ledgers, payroll, human resources management, project accounting and billing association management, encumbrance accounting and executive information system.

Vision /R4 has the experience and the resources required to answering the needs of its clientele. Our partnership with some of the world's leading enterprises give us the opportunity to present you with a "Business Solution", in term of business procedure systemization, accounting and management integrated software, equipment, telecommunication and operational support. Our approach is one of partnership. In other words, our group is implicated with the client in the management of changes during the implementation on-site; making sure that the knowledge and expertise is transferred to the end-users.

We sincerely believe that as a potential supplier, we can offer your organization the best alternative solution:

- We support customers worldwide (North and South America, Africa, the Caribbean, Brazil and Europe) from our office in Montreal.
- We continue to invest annually in R/D in order to allow us to be on the cutting edge of technology, which is important for you as a customer.
- Source Code is installed at every client site for security and support purposes.
